EXAMINER'S AMENDMENT

1. Applicant's amendments filed January 26, 2009 are acknowledged.
2. Claims 15 and 22 have been canceled.
Claims 12-14, 16-21, and 23 are pending.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Russell Warnock on May 4, 2009.

The application has been amended as follows:

In Claim 12, after the words "activated by a user", replace the words "determining whether an initial switch on condition within the water-bearing domestic cleaning appliance exists, the initial switch-on condition being caused by at least one of an initial post-installation activation of the water-bearing domestic cleaning appliance and the user-activated self-cleaning program setting, and, if such an initial switch-on condition exists, and upon affirmation by the user;" with the following

-- and wherein the program control device determines whether the initial switch-on condition exists, the initial switch-on condition being a post-installation activation of the water-bearing domestic cleaning appliance; and wherein the program control device determines whether a user-activated self-cleaning program has been selected; and, if

Art Unit: 1792

such an initial switch-on condition or user-activated selection exists, and upon affirmation by the user--.

In Claim 21, after the words, "the initial switch-on condition being", delete the words "caused be at least one of".

In Claim 21, replace the phrase, "recognizes an initial switch-on condition within the water-bearing domestic cleaning appliance, the initial switch-on condition being caused be at least one of an initial post-installation activation of the water-bearing domestic cleaning appliance and a user-activated self-cleaning program setting" with the following:

--recognizes an initial switch-on condition within the water-bearing domestic cleaning appliance, the initial switch-on condition being an initial post-installation activation of the water-bearing domestic cleaning appliance,

and recognizes a user-activated self-cleaning program setting; and upon recognition of either condition--

In Claim 23, after the phrase, "determining whether an initial switch-on condition exists within the water-bearing domestic cleaning appliance, the initial switch-on condition", delete the words, "caused be at least one of".

In Claim 23, after the words, "initial post-installation activation of the water-bearing domestic cleaning appliance, delete the words "and a user-activated self-cleaning program setting,".

In Claim 23, after the words, "upon determining that the initial switch-on condition exists", insert the following:

--or upon determining that a user-activated self-cleaning program setting has been selected”

4. The following is an examiner's statement of reasons for allowance: the reviewed prior art does not disclose or render obvious a program device for a water-bearing domestic cleaning appliance which is controlled to recognize an initial switch-on condition of the appliance after manufacture, and perform a self-cleaning upon recognition of the initial switch-on condition. The closest prior art of record are Sharpe (US Patent 3,770,376) and Mamakawa et al. (JP 02-104396).

5. Sharpe teaches a method for sanitizing a domestic clothes washer. He teaches a method in which a “Sanitize” cycle is selected and causes a predetermined amount of detergent to sanitize the interior of a washing machine tub as part of a timed cycle (see abstract and col. 6, claim 1). However, it does not anticipate or suggest fairly a program device for recognizing an initial switch-on condition after manufacture or installation to prompt a self-cleaning cycle.

6. Mamakawa teaches a method for automatically cleaning the interior of a washing machine. He teaches a means for controlling an automatic function of the cleaning process and a means for setting an input signal to initiate the tub cleaning process (see English translation, page 4, paragraph 5 and page 7, third full paragraph). However, it does not anticipate or suggest fairly a program device recognizes an initial condition after manufacture for self-cleaning.

Art Unit: 1792

7. No other prior art that anticipates or suggests fairly the instant claims has been located as of the date of this office action. Therefore, claims 12-14, 16-21 and 23 are allowed over the prior art of record.

Conclusion

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NATASHA CAMPBELL whose telephone number is (571)270-7382. The examiner can normally be reached on Monday-Friday; 8 AM-4 PM.
